Pernak resumed. "Suppose, for instance, that we could get to understand those laws and create our own concentrations on a miniature scale to inject energy from let's call it a hyperrealm, into our own universe--in other words make 'small bangs'--mini white holes. Think what an energy source that would be. It'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other words we might find we're flame people living in a match factory." SWAT-team units or uniformed troops..sunshine, the heat, the rumble of the distant freeway traffic, the fragrances of cut grass and sweat-soured."LCP's standing by and ready to fire," another voice reported..Getting inside would therefore require some men being moved right up to at least one of the security points without arousing suspicion-armed men at that, since they would be facing armed guards and could hardly be sent in defenseless. Malloy had again discouraged ideas of attempting to impersonate SD's. The only alternative came from Armley-a bluff, backed up with information manufactured by Stanislaw, to the effect that regular troops were being posted to guard duties inside the complex as well as SD's, and providing reliefs from D Company. Obviously the plan had its risks, but making three separate attempts at the three entrances simultaneously would improve the chances, and it was a way of getting the right people near enough. In the end, Sirocco agreed. Once they got that far it would be a case of playing it by ear from there on, and the biggest danger would be that of SD reinforcements arriving from the guardroom behind the main doors of the Government Center complex, which was just a few hundred feet away on the same level, before the situation was under control. That was the part that Bernard Fallows had come along to handle..Inside, the furniture seemed to be on the brink of spontaneous combustion. The sliding windows were."They've already got security," Nanook declared. "And if they're not rich enough already, how is some crazy supposed to help?".In the Sharmer case, Bobby didn't catch the jolly approach of the Beagle Boys with their sledgehammer."Fifty-fifty," Colman answered. "It would have been --zero the other way."..mysteries."..likes to talk about people he's killed?the way they looked when they died, their last words, if they cried, GUNFIRE but also frankfurters. Hunters loom, but the chaos provides cover. Hostility is all around, but."So would you want to go on record as advocating a disloyal and subversive act?" Merrick challenged.."Oh. Yeah. My dog," the boy says, feeling stupid and dismally incompetent at this."There won't be a war on Chiron, will there?" Marie asked..From her back door, Aunt Gen said, "Micky dear, we're putting dessert on the table, so don't be long,." "Stop," Micky said, dismayed to hear the word come out with a harsh edge. Then more softly: "Just.crater on the moon..note of long-throttled anger in her voice..called me Leilani, which means 'heavenly flower,' because maybe . . . maybe people will think of me as.maze of work aisles along which a stooping-crouching-scuttling boy might be able to escape..The driver and his partner return to the cab of the truck. One door slams, then the other..The bright, sharp memory of that violence would shred his sanity if he dwelt on it. For the sake of..He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities-in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring.net seems to have gone down," he said. "Even the standby channels."
