Bernard was watching with interest over Stanislaw's shoulder. After being dropped off by Barbara and reentering Phoenix with the others, he had gone home to update Jean on what was happening and then left for the barracks, where Colman had smuggled him in for the briefing. It was just as well that he had; the scheme that Sirocco finally evolved required some familiarity with the Mayflower II's electrical systems, and while Colman had been prepared have a crack at that part of it, Bernard was the obvious. first shots were fired in the kitchen.. But I think it's a mistake to believe that there just wasn't anything, in the causal sense, before that --if 'before' means anything like what we usually think it means." Pernak sat forward and moistened his lips. 'Til give you a loose analogy. Imagine a flame. Let's invent a race of flame-people who live inside it and can describe the processes going on around them in terms of laws of flame physics that they've figured out. Okay?" lay frowned but nodded. "Suppose they could backtrack with their laws all the way through their history to the instant where the flame first ignited as a pinpoint on the tip of a match or wherever. "Are you telling us we're prisoners?" the Chironian man asked. "When you've got enough to eat and drink, then you worry about keeping warm. And when you're warm enough, you start thinking about staying safe." Colman opened his hands briefly. "When a bunch of people live together, for most of the time most of the people get enough to drink and eat, and manage to keep warm and safe. What do you think they start worrying about then?" "Oh, so it's trouble them fellas is looking for, is it?" a voice with just a hint :of an Irish brogue asked softly from the doorway. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. For a few seconds that dragged like minutes, the charge in the room crackled at flashpoint. Nobody moved.. Celia took a quick breath, held it for a moment, and then lifted her face toward him. "Very well. I've seen what happened to the corporal and to Padawski. The Chironians retaliate against whomever they perceive as the cause of hostility directed against them. If the evictions are enforced." "The mediocre shall inherit the Earth," Kalens had told his wife, Celia, after returning to their Delaware mansion from a series of talks with European foreign ministers one day in 2055. "Or else, eventually, there will be another war." And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Chiron would be a clean' canvas, unspoiled and 'unsullied, awaiting, the fresh imprint of Kalens's design.. all your doubt, breathe it out, pluck it from your heart, tear it loose from your mind, throw it away, be rid. "Down!" Maddock yelled, and all three hurled themselves sideways to get out of the line of fire as a smoke grenade launched from around a corner some distance behind them exploded at the entrance. She remembered an old short story that she'd read, "The Lady or the Tiger," in which a man was forced. Marcia Quarrey, the Director of Commerce and Economic Policy, didn't look too happy at the suggestion as she sipped her cocktail. "Obviously that would be possible," she said, setting down her glass. "But would it serve any useful purpose? The contingency plans were made to allow for the possibility of opposition. Well, there hasn't been any opposition. What's the sense in throwing good business and growth prospects away by provoking hostilities needlessly? We can acquire Franklin simply by walking in. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colon, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam. though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene-given to her by one of her friends, Kath had said when he remarked on it-interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known.
